

**Do you ever wonder how your business will survive when technology is changing so fast?**

**Cancel Order** ×

Are you sure you want to cancel this order?

**Why not let Tucalo guide you, with our supply chain partner services, Ai Work Agent software and business assistance**

# How business is changing

All businesses have one thing in common - they need to stay organised. Once a business begins to lose smooth workflows, supply chains fall down, customer service begins to dwindle, orders are lost, production slows, and your business begins to suffer.

Whether your business is just starting out, building up, expanding or is fully established, it is imperative to stay laser focused. It is essential to understand what needs to be done, when it needs doing and to have contingency plans ready for when your business comes under strain.

Tucalo have worked tirelessly to bring a new product to the market that will greatly assist organisations to be just that - organised. With core services and twenty-six separate industry specific services, our new product - Ai Work Agent - is here to help your business take the strain and run efficiently.

Ai Work Agent is integrated with our supply chain partner services that bring everything in-house, making your business processes simple and efficient. Tucalo are also on hand to assist when your business experiences spikes in workload. That leaves you free to concentrate on the day to day running of your business so you can maintain a healthy bottom line.

Tucalo strive to keep businesses healthy and keep customers happy. When you need help, we are there. We carefully calculate how to bridge the gaps that put your business at risk and get you across to the other side of your problems. Read on to find out more about how we can help you and your business.

**Andy - Director of Tucalo**

# Ai Work Agent - our brand new product

What will save your business in the long term?

Standard workforces face the challenge of not being able to work around the clock every day of every year. They can't scan millions of pages on thousands of websites for data, work day and night non-stop on your database, preparing invoices, sending customers offers, looking for new business, checking diaries for gaps and fill them, find more effective ways for your business to operate, phase out products that are near end of life cycle, analyse data to predict maintenance life cycle of assets, prepare optimised plans using panoptic view and complex algorithms giving ultimate safety and ROI. And ... there's so much more.

The all new Ai Work Agent from Tucalo harnesses an Ai robot pool that works non-stop, can work to scheduled tasks and be re-assigned to deal with spikes in workflow. They work around the clock, out of hours through world time zones where necessary, and they never stop. If ever their seemingly impossible capabilities actually do get outstripped, our Ai Work Management Agents will have already forecast this and let us know ahead of time so we can install more robots and scale up our infrastructure to the new scale capability. Connectionless database technology, with vaulted data, also protects your business. Combined with our in-memory sanitisation triggers to purge cyber attacks, Ai Work Agent brings a new era of cyber security through improved design.

This is the new world of business, and although it may seem daunting to some of us, businesses who fail to harness this technology will simply be left behind as those who modernise get faster, more efficient, and begin to dominate the markets. So why wait, contact Tucal today to find out how you can take that vital step and futureproof your business.

# Supply Chain Partner Services

We have now combined Ai Work Agent with our business to business catalogue, which is managed by Tucalo. This has allowed us to offer integrated products straight into your software and customer website for resale at retail level or on a further B2B basis if you're an agent. The catalogue also incorporates both open and closed tendering process. With this new added feature, you truly can now run all your business operations from one single platform.

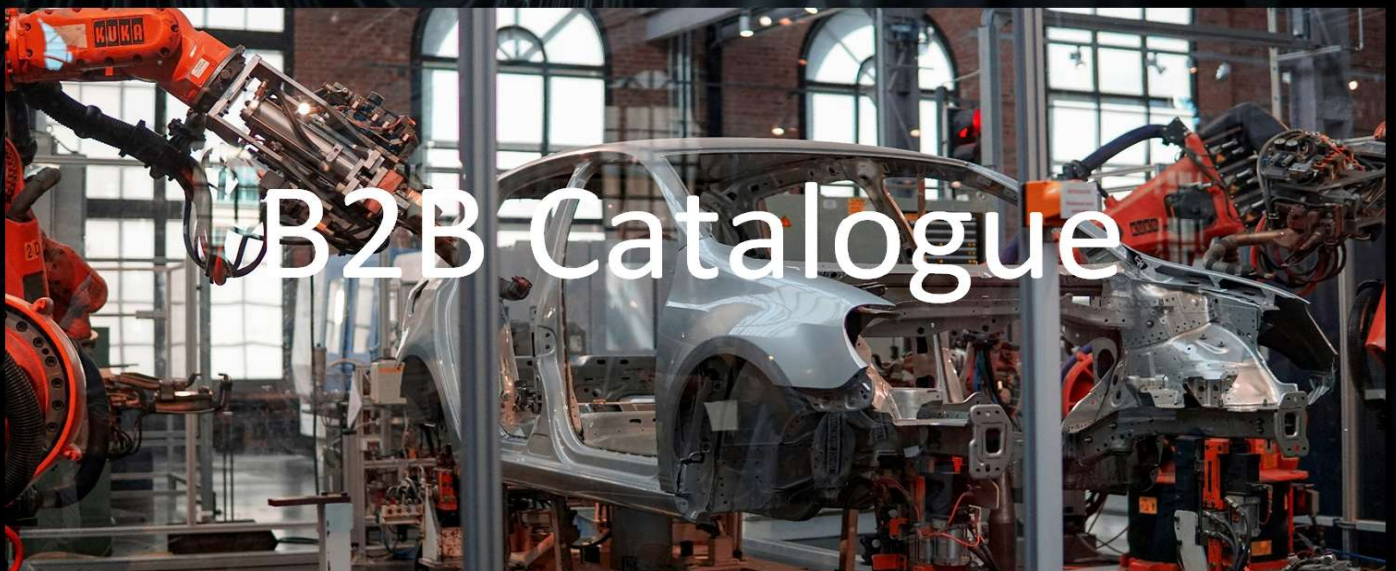

Tucalo supply chain allows our customers to have one point of contact, reducing time and uncertainty on quality and suitability when product sourcing.

We provide both products and services, so we can assist with construction, installation and maintenance associated with catalogue products.

Whether you want products for resale to other businesses, retail or you need materials for a project such as construction work to expand your business premises, we can provide both products, services and even manage the project for you in cases where you simply don't have the time over and above your daily business workload.

We work closely with our customers to make sure we provide the correct products that suit their business requirements, removing the risk of trying out new products that are unfamiliar and that may not meet business needs, which can result in costly mistakes.

# Industry Environments

## Engineering

Our software offers the perfect platform from which to run your engineering operations, with facility for full strategic control over your business including asset management, scheduling, work management, rostering, stock control, fleet management and finance.

# Business support & product pricing

Ai work agent comes with a full support package, from full manual, help desk ticketing, online training videos, live online sessions and where required, in-house face to face training.

In addition to Ai Work Agent SaaS, Tucalo also offer standard services to support your business which include:

Web design

Marketing materials: logo design  
brochures, leaflets & business cards  
merchandise  
brand registration

Marketing strategy: digital marketing  
direct marketing  
analytics  
mailing lists

Business support to help you run your business for both standard businesses or franchise, to both new startups and existing businesses looking to expand and develop.

General business training - we have a range of courses, including health & safety, management, marketing and finance. We can also produce bespoke courses based on your specific needs.

So what does it all cost? You'll be pleasantly surprised when you see our pricing plan. By far our best deal is subscriber, which includes discounts and some free services.

Our plans:

Ai business development program - pay a fixed monthly fee to start your journey working towards full Ai digitisation and future-proof your business. Also gain access to discounts on standard services and training courses.

Standard services developer package - if you only require a specific service such as web or brochure design, you only pay for the specific service we provide. Contact us to discuss your requirements and we'll advise you on the best plan for your business.
